

# Shut Down Racism, War and Bigotry!

## March on 1 year anniversary of Trump

When Trump and the 1% attack, we will fight back! @answerchicago on twitter and facebook

A year into his and presidency, Trump, the 1% and the establishment, feeling more confident that they will not have to face resistance in the streets, have gone on the offensive, approving the racist travel ban, empowering racist police departments and ICE, attacking Native lands and the environment, passing the Tax Plan assault, threatening LGBTQ rights with the phony "religious liberty" nonsense, funding and escalating the Saudi genocide in Yemen, preparing for a disastrous war against perhaps Korea or Iran, backing an election coup in Honduras, threatening net neutrality, attacking the Arab and Muslim world by declaring Jerusalem the capital of Israel and much, much more.

**We will not be idle! We will not wait another minute, month or year to take action. We will march in the largest numbers possible. Spread the word! Bring your signs, banners and voices of resistance!**

Trump and the congress of millionaire's agenda of unrestrained capitalism and white supremacy and the warmongering and fake resistance of democratic politicians can only be defeated by a united people's movement to stop racist police terror, imperialist war, environmental destruction, the fascist mobilization and the attacks on immigrants and all oppressed people.

We stand with and will continue to defend immigrants, LGBTQ people, Muslims, People of Color, women, workers, the youth, poor people, the disabled and all those who are under attack!
